

Yellow warning
Wind

Between
00:00 Fri 18 Feb 2022 and
21:00 Fri 18 Feb 2022

Storm Eunice is likely to affect the UK on Friday bringing a period of very strong winds that could cause significant disruption.

What to expect

- There is a small chance that flying debris will result in a danger to life, with fallen trees, damage to buildings and homes, roofs blown off and power lines brought down
- There is a small chance that injuries and danger to life could occur from large waves and beach material being thrown onto sea fronts, coastal roads and properties
- Where damaging winds occur, there is a chance that long interruptions to power supplies and other services may occur
- There is a small chance that roads, bridges and railway lines could close, with long delays and cancellations to bus, train, ferry services and flights

00:00 Fri 18 Feb 2022 and
21:00 Fri 18 Feb 2022

Further details

Extremely strong winds may develop over southwest England early on Friday, before spreading north and east during the morning. It is not yet clear where within the warning area the strongest winds will be but gusts of 60-70 mph are possible over a reasonably large area with a small chance of a brief period of gusts reaching 80 mph even inland. Coastal winds are likely to be the strongest.

In addition to the wind, there is the potential for a period of snow and perhaps blizzard conditions, most likely over northern England, parts of Scotland, Northern Ireland and north Wales. However, this is very dependant on the track of the weather system and most places will see heavy rain instead.
